O2 Sensor Extension/Adapter Kit by Namz Cycle Products

Got your eye on that perfect exhaust system for your Bagger but it only fits up to 2009? Well the crew at Namz has solved that problem with this slick new kit. It's fast and easy to install; simply plug it in between the front O2 sensors and the OEM wiring harness and install the reducer plugs into the O2 sensor ports on the exhaust header and thats it your done!

664180 O2 Sensor extension/adapter for all 10-up Touring models and 12-up Softails and Dynas.\$31.99

Hot Box Accessory Wiring Harnesses by Namz Cycle Products

NHB-B02

Features two separate detachable harnesses for each saddlebag with RUN, TURN SIGNAL and BRAKE functions. Designed to run with your stock rear lighting harness, just unplug your stock harness and plug the Namz unit in between and your done! This module is perfect for relocating your turn signals to your saddlebags or if you just want to add some custom lighting to your saddlebags.

664133 Fits all Big Twins from 96-13 (except 11up Softails and 12up Dynas)\$179.99

664141 Fits 10-13 FLHX and FLTR models\$179.99

NHB-B03

This unit utilizes a load equalizer and provides a detachable right & left turn signal harness for each saddlebag that will operate both standard incandescent or LED bulbs. Designed to run with your stock rear lighting harness, just unplug your stock harness and plug the Namz unit in between and your done! This module is perfect for adding custom lighting to your saddlebags while keeping your all your OEM lights.

664134 Fits all Big Twins from 96-13 (except 11up Softails and 12up Dynas)\$149.99

664142 Fits 10-13 FLHX and FLTR models\$149.99

Throttle-by-Wire Extension Harness by Namz Cycle Products

Namz new Throttle-by-Wire harness is 'plug-n-play' and a no brainer when installing taller handlebars. It is longer than stock and is one size fits ALL handlebars. Simply remove the OEM harness and plug this one in. It comes complete with OEM connectors installed for simple installation.

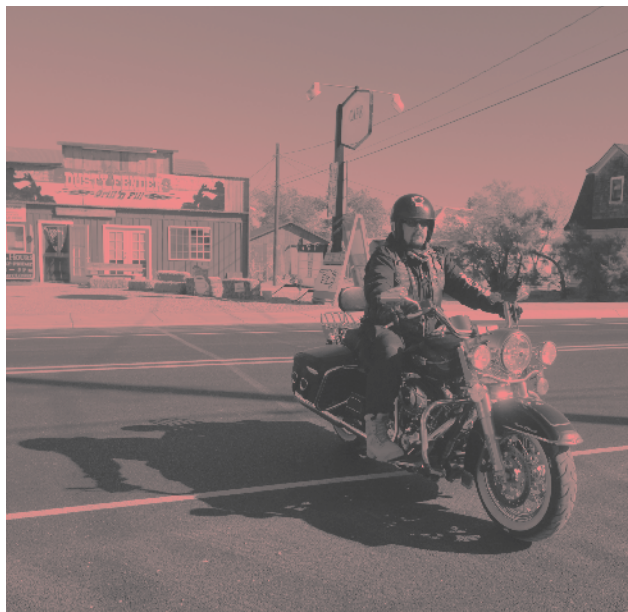

664120 Fits all Touring models from 08-13.\$43.99

Rear Fender Power Tap by Namz Cycle Products

So you need some extra power but you don't want to cut your wiring harness up? Here's the answer. The Namz Power Tap Harness allows you to simply install their plug-n-play harness in between the rear fender and main harness and it gives you a 12-volt switched power source.

664136 Fits all Big Twins from 96-13 (except 11up Softails and 12up Dynas)\$29.99

EXCLUSIVE**

Motor Factory Finned Rectifier/Regulators

These rectifier/regulators utilize the latest state-of-the-art surface-mount technology. Unlike many products on the market today, our rectifier/regulators are made with screen-printed circuit boards and ceramic components which lower operating temperatures for longer life without temperature-related failures. They deliver improved electrical performance for lighting, battery and ignition which also helps protect valuable power sources and wiring. They're covered by our exclusive 'High Voltage' limited warranty that effectively extends coverage to one full year from date of installation. Standard black finish with polished fins or fully chromed. Engineered in the USA. **See table for applications.**

ACCEL

Accel Voltage Rectifier/Regulators

Solid-state designs feature Accel's chrome or black baked enamel finish. Regulators are individually tested before shipment and packaged with complete installation instructions and warranty card.

See table for applications.

J&M ROKKER XT 7.25" Fairing Speaker Kit 06-13 StreetGlide/Ultra/Roadglide

J&M's NEW ROKKER XT series 7.25" drivers, with extreme high-temp voice coil, are the largest diameter speakers that can be installed into the Harley Bat Wing or Roadglide style fairing, with cone volume and mass comparable to a 6X9" speaker. This complete custom speaker installation kit has been designed specifically for the 06-13 StreetGlide, ElectraGlide or Roadglide Fairing. Spec'd at 2 ohms impedance and 170+ watts max power, these new speakers provide the ultimate in bass response, extended mid/high frequency range and raw audio power

Features of this new ROKKER XT series speaker kit from J&M are:

- Waterproof injection-molded polycarbonate driver cone
- High-flux strength but lite-weight dual-donut Neodymium magnet
- High efficiency VENTED voice-coil for improved cooling when operating at high volume levels for extended periods
- Custom designed grillwork with high-output titanium-colored tweeter and midrange drivers, with a second set of paintable grills also included
- Top-quality adapter rings/bracket hardware for secure and clean mounting into the fairing. (Hardware included to utilize the old or new designs of the Harley inside-fairing metal-brackets)
- Mounting hole pattern and spade electrical connections are exactly the same as the factory specification, this is a total plug-and-play no-modification solution complete with easy to follow installation instructions.

688801	Fairing speaker kit 06-13 FLH/X/T/CU	\$369.99
688802	Fairing speaker kit 06-13 FLTR (except CVO)	\$369.99

J&M ROKKER XT 7.25" Saddlebag Lid Speaker Kit

J&M's XT series 7.25" drivers are the largest diameter speakers that can be installed into the Harley Bagger style saddlebags, with cone volume and mass comparable to a 6X9" speaker. This complete custom speaker installation kit with lids, has been designed specifically for the 98-13 Harley Bagger saddlebags. Spec'd at 2 ohms impedance and 170+ watts max power, these new speakers provide the ultimate in bass response, extended mid/high frequency range and raw audio power.

Features of this new ROKKER XT series speaker kit from J&M are:

- Waterproof injection-molded polycarbonate driver cone
- High-flux strength but lite-weight dual-donut Neodymium magnet
- High efficiency VENTED voice-coil for improved cooling when operating at high volume levels for extended periods
- Custom designed grillwork with high-output titanium-colored tweeter and midrange drivers, with a second set of paintable grills also included
- Saddlebag lids are finished in primer black color, ready for the custom color of your choice
- Top quality hardware, custom plug-n-play wiring harness and complete installation instructions are included.

MOTORCYCLE AUDIO

J&M ROKKER XT Dual 7.25" Harley Saddlebag Sub-Woofer Speaker kit

J&M's ROKKER XT series 7 1/4" round sub-woofers are large diameter dedicated low-frequency speakers, with cone volume and mass comparable to a 6X9" speaker. Spec'd at 2 ohms impedance, 40-3kHz frequency response and 200 watts max power, these new J&M subs provide the ultimate in bass response & low-frequency audio power. This custom kit allows these new J&M sub-woofers to be mounted down into the rear portion of the stock Harley saddlebags, while leaving more than 75% of the saddlebag storage area available for normal luggage.

Features of this new J&M ROKKER XT series dual-subwoofer kit are:

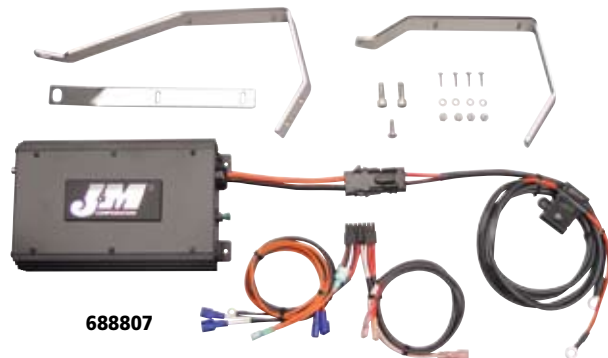

- Waterproof mylar/polycarbonate woofer cone
- High-flux strength but lite-weight dual-donut Neodymium magnet
- High efficiency VENTED voice-coil for improved cooling when operating at high volume levels for extended periods
- Custom designed grillwork for mounting in the rear saddlebag position, with mounting spacers, weatherproof gasket seals & protective rear luggage cowl.

J&M ROKKER XT 7.25" Lower Fairing Speaker Kit

ROKKER XT series 7.25" drivers, with extreme high-temp voice coil, are the largest diameter speakers that can be installed into the Harley LOWER fairing shells, with cone volume and mass comparable to a 6X9" speaker. This new high-power three-way speaker set has been designed specifically for the 06-13 Harley Ultra or Harley StreetGlide/RoadGlide custom with the factory Harley Ultra LOWER fairing shells installed. Spec'd at 2 ohms impedance and 170+ watts max power, these new speakers provide the ultimate in raw audio power from the lower fairing position.

Features of this new ROKKER XT series speaker kit from J&M are:

- Waterproof injection-molded polycarbonate driver cone
- High-flux strength but lite-weight dual-donut Neodymium magnet
- High efficiency VENTED voice-coil for improved cooling when operating at high volume levels for extended periods
- Custom designed grillwork with high-output titanium-colored tweeter and midrange drivers
- Specially-tuned speaker-mounted passive crossover network for improved fidelity & frequency response
- Top-quality LOWER fairing housing inserts molded specifically to fit the vented Harley lower fairing shells
- These high-impact quality molded speaker inserts are textured in a matt finish and can be painted to match the color of your Bagger.

688803 Lower fairing speaker kit\$449.99

J&M LOWER Speaker In-Series Wiring kit for 06-13 Harley Lower Fairings

This in-series wiring harness kit is to be used when connecting the J&M ROKKER XT series 7.25" LOWER fairing speakers, together with the J&M 7.25" UPPER fairing speakers, to a J&M in-fairing mounted 2-channel amplifier, (4 speakers total on the motorcycle) OR the front 2-channels of a J&M in-fairing 4-channel amplifier (6 speakers total on the motorcycle).
